Gino’s Cafeteria

Indulge in the timeless charm of Italy right in the heart of your neighborhood at Gino's Cafeteria – your go-to destination for an authentic Italian coffee experience. Step into a haven where the aroma of freshly ground beans mingles with the warm embrace of traditional hospitality.

At Gino's, we take pride in crafting the perfect cup of coffee, just like Nonna used to make. Sip on our meticulously brewed espresso or savor the rich flavors of a cappuccino, all expertly prepared by our skilled baristas. Our coffee is more than just a beverage; it's a journey to the streets of Rome, where each sip tells a story of passion and craftsmanship.

Gino's Cafeteria is ushering in a new era of convenience and rewards! As we continue to cherish our rich Italian traditions, we're also embracing the modern age by upgrading our customer reward program. Say A*rrivederci* to the old-fashioned card stamp system and B*envenuto* to the Gino's Cafeteria app.

With our new app, we envisage that earning and redeeming rewards has never been more seamless. We want customers to simply use the app at the counter and watch their loyalty points add up effortlessly. It is planned that the app will keep customers in the loop with real-time updates on the latest promotions, events, and secret menu items. Eventually the end vision of the app is to allow customers to order and pay for items on the coffee shops menu.

Functional Requirements:

1. ***User accounts***
   1.1. Allow users to create an account
   1.2. Allow users to delete their account

2. ***Login***
   2.1. Allow users to log in with a password
   2.2. Allow users to change their password

3. ***Ordering System***
   3.1. Allow users to view a menu.
   3.2. Allow users to place orders through the app.

4. ***Payment Methods:***
   4.1. Simulate payment for goods with cash
   4.2. Simulate payment for goods with a card/contactless
   *(**Important:** These should be simulated payments, do not attempt to create real payment methods)*

5. ***Loyalty Program:***
   5.1. Track accrual of loyalty points based on purchases.
   5.2. View loyalty points total

6. ***History and Tracking:***
   6.1. Create A log file of transactions
   6.2. Display transaction logfile

Advanced Requirements:

1. ***Login Security***
   1.1. Enforce password length and complexity (E.g. 8 upper & lower case characters, with a number & a punctuation mark)
   1.2. Password Obfuscation in app screens (E.g. Hash)

2. ***Profile Management:***
   2.1. Allow users to add personal information to their account.
   2.2. Allow users to delete an account

3. ***Payment Integration:***
   3.1. Simulate Payment with Loyalty points.
   3.2. Redemption of Loyalty points for merchandise or discount
   *(**Important:** These should be simulated payments, do not attempt to create real payment methods)*

4. ***Back up***
   4.1. Safe log file to external drive
   4.2. Load log file from external drive

5. ***Notifications:***
   5.1. Generate notifications for promotions, new menu items, and rewards.
   5.2. Create an 'Order ready for collection' Notification (Simulate a wait time after order creation)

6. ***GUI***
   6.1. Create a GUI for the app
   6.2. Allow text size to be increased

By incorporating these functional and advanced requirements, the coffee shop app can provide a seamless and secure experience for users while meeting the objectives of the business.
